Science:

In Science we have been learning about how to stay healthy.

Draw different ways people can stay healthy (for example, someone doing some exercise or which foods are important to eat).

Remember:

- being healthy doesn't just mean eating vegetables (although that's very important!), there are other things you need to eat too.
- think about how to stay clean and how we stop germs from spreading.
- how much sleep you need.
- it is important to keep our brain healthy too.
